YUNEX TRAFFIC

Unrivalled experience and expertise

Yunex Traffic is a global leader in the development and delivery of enforcement and traffic management solutions, working closely with more than 60 of the UK's local authorities and the majority of London Boroughs to make our streets and roads safer and healthier.

With unrivalled experience and expertise, we have delivered a wealth of projects of all shapes, scope and complexity. From city-wide low emission and clean air zones to average speed road safety solutions; from school streets to local, targeted moving traffic offence enforcement projects.

Our solutions provide the best detection and highest accuracy & availability rates, enabling authorities and their enforcement teams to optimise productivity and achieve the highest return on their investment in technology and staff.

UK based

Our proven Enforcement solutions portfolio is backed by experienced in-house design, development and consultancy teams.

Based at our UK head office and award-winning manufacturing facility in Poole, and across numerous UK regional depots and offices, our experts can provide support and advice to local authorities in choosing the right solution for your specific needs.

We can also provide expert help to complete applications for enforcement powers, conduct trials and feasibility tests and collect supporting evidence to support applications.

For any given hardware price point, our software produces the UK's highest rate of enforceable contraventions.

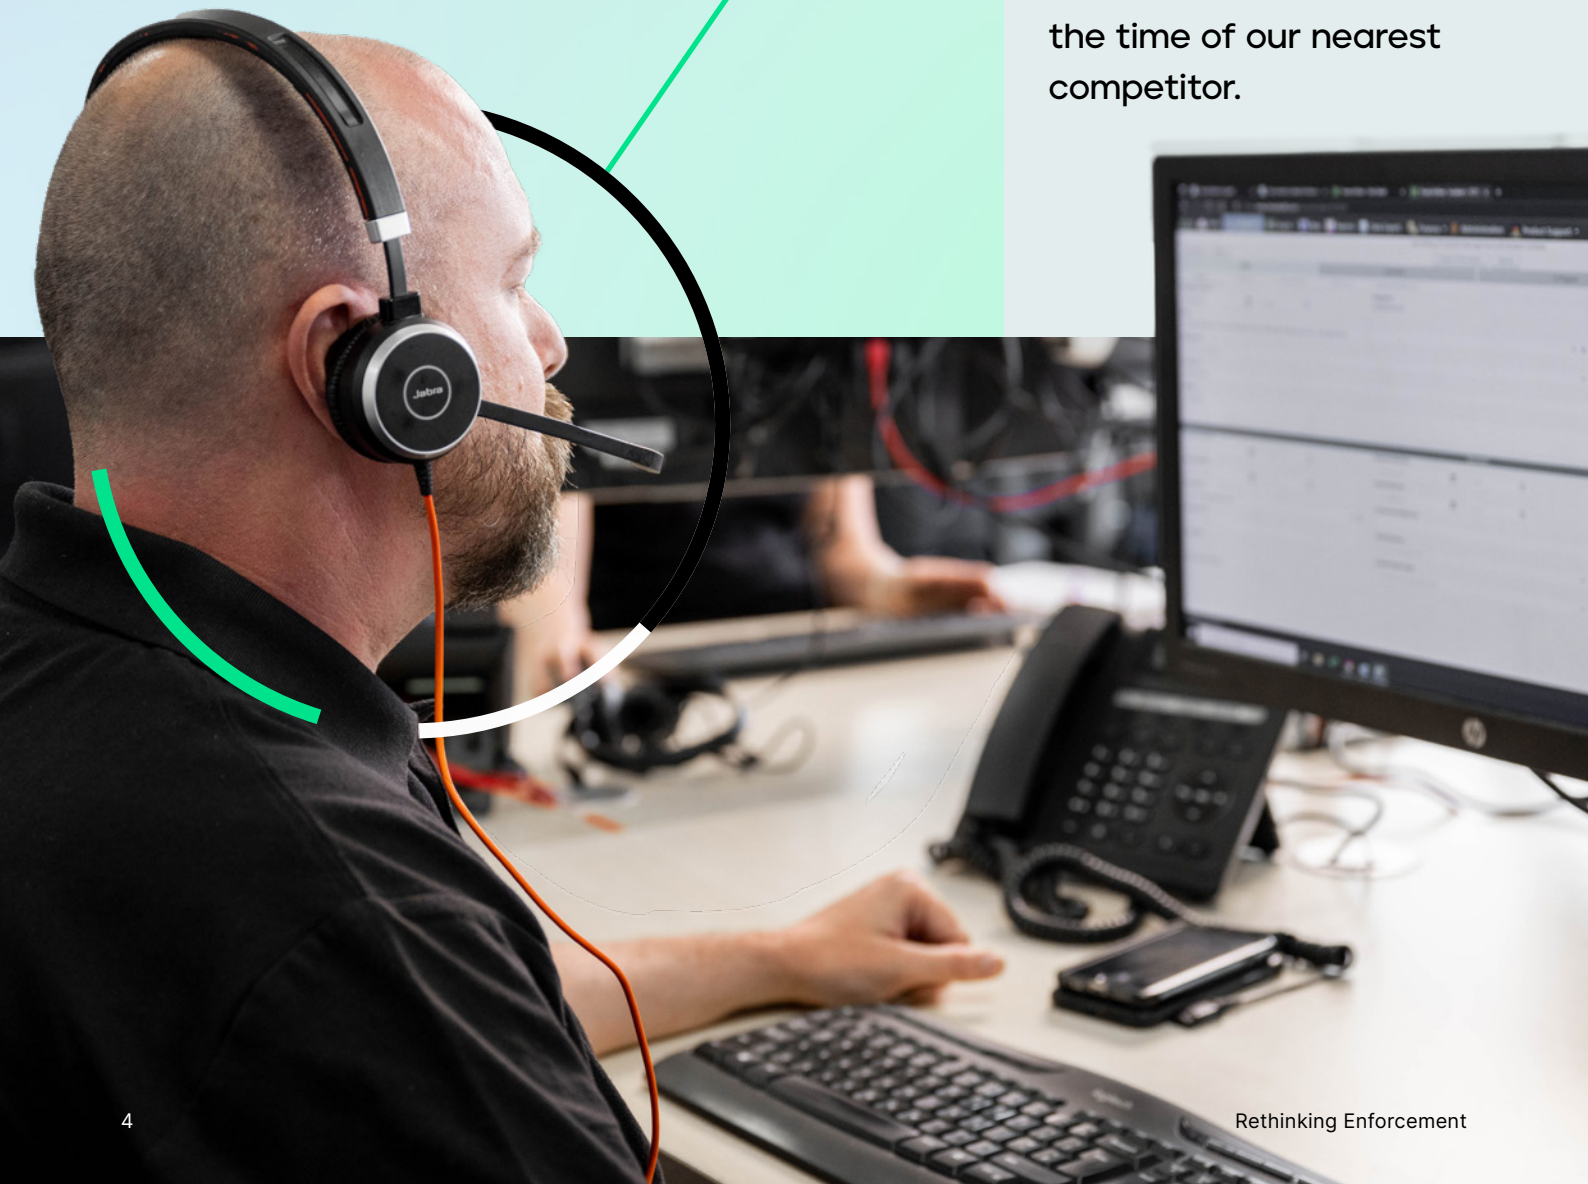

Proven technology

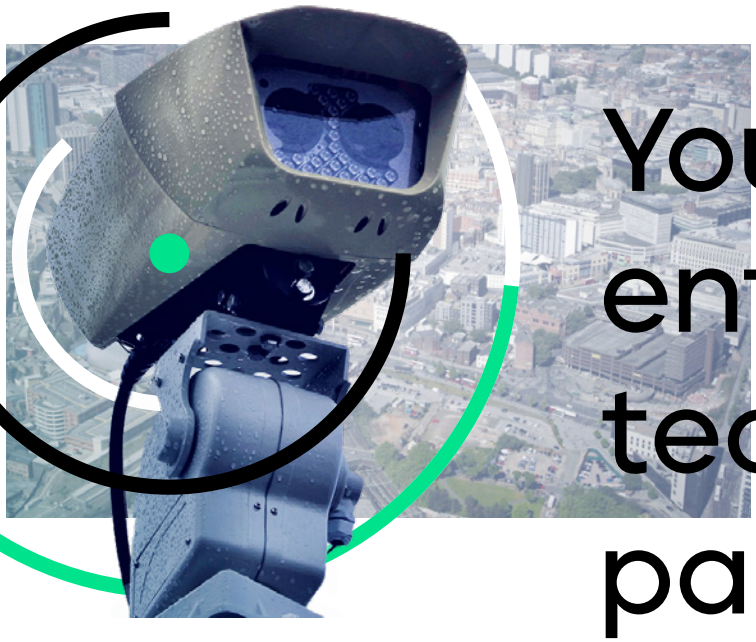

Fast and easy to install, our fully scalable, hosted and future-proof solutions provide secure, remote and unattended operation for enforcement applications and deliver exceptional value for money.

In the UK, we have deployed:

- Over 2,400 ANPR cameras for civil enforcement applications.
- More than 5,000 ANPR cameras for low emission and clean air zones.

Our software enables operators to review contraventions in half the time of our nearest competitor.

Your trusted enforcement technology partner

We work with customers at every stage of the process, from product selection, scheme design and camera positioning, right through to installation and commissioning to deliver robust, reliable and integrated enforcement schemes.

Our solutions use market leading, HOTA and VCA-approved ANPR and AI technology to identify potential contraventions and capture evidential data, providing accurate and effective enforcement of:

- Bus lanes, gates & stops
- Yellow box junctions
- School streets & keep clear zones
- Clean air zones
- Pedestrian zones
- Speed restrictions
- Tolling
- Restricted access zones
- Width & weight restrictions
- Banned turns
- Cycle lanes
- No-entry & one-way systems
- Temporary speed restrictions at roadworks
- Road user charging

Supporting TMA Part 6 Applications

Traffic Management Act 2004 Part 6 allows councils outside of London to enforce on moving traffic offences and issue Penalty Charge Notices (PCNs).

We offer a number of services to support local authorities through their application for powers as part of the TMA Part 6 legislation, including:

- Designation order support
- Design, site surveys, trials & feasibility studies
- Pre-application engagement with stakeholders
- Air quality monitoring
- Web review suite & back-office processing
- Camera technology (ANPR Enforcement)
- Training and ongoing support
- Reporting tools

Yunex Traffic

Yunex Traffic is a separately managed company of the Mundys Group. We are a global leader in the field of intelligent traffic management & enforcement solutions.

Yunex Traffic has over 3,500 employees from 62 nations and is active in over 40 countries worldwide.
